

NAB petition 04-160 definitely is not in the best interest of us who live in the outlying areas and travel this country by RV just to see what America is all about. I don't think America is about depriving us of info we want and pay to receive. We have come to rely on the weather report and travel advisories we receive on XM satellite radio.

Trust that if NAB choses to deny us this feature that they will reinburse us for our contract fees with XM radio!!!!
